

Increase your safety training compliance by letting us help you deliver cost-effective online training solutions. We collaborate with you to create customized and applicable training which your employees take at their convenience. Courses can include engaging learning activities, video, and quizzes and all their training history is recorded and tracked. We can even provide turn-key training administrative services. Ask us for details.

Content Development and Production

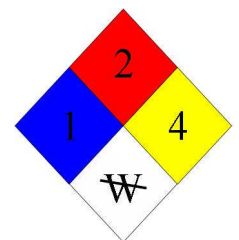

- **Subject Matter Experts**- we are subject matter experts who design training which meets legal requirements and industry standards while being applicable to your employees.
- **Focused and Applicable** – we will work with you to include applicable information, procedures, and examples in the training. This can include site-specific photos, video, etc.
- **Cost Effective** – we use tools that allow us to move from content to produced training in the minimum amount of time and expense. We have many of the skills and talents in-house, so the cost is often much less than you find elsewhere.
- **Update with Ease**– some safety training companies make it prohibitively expensive to make even a small change in a produced training module. Not us.
- **We Listen and Care**– we are in it for the long haul and truly care about results and your satisfaction.

Tracking and Reporting

- **AICC/SCORM** – our trainings are compliant with industry standards, so you can be assured that the training activity and quiz results are accurately tracked and recorded.
- **Tracking** – our online system tracks the employee's progress every time they log in and take a course or quiz.
- **Reporting** – we can provide reports in formats that are useful to you and others in your company.
- **Uptime and Security** - the online system we use has highly trained, level-three technicians on-site 24/7, 365 days a year dedicated to round-the-clock security and uptime. Physical security, data backup and uninterrupted power is provided to ensure your data is intact.
- **Very Affordable** – you will be charged on a usage basis. We will work with you to plan cost-effective options.

Training Administration

- **Training Assignments / Groups** – Let us help you determine the appropriate training for your employees based on their responsibilities, type of work they do, etc.
- **Existing and New Employees** – Managing the training of a changing workforce can be a struggle. We can determine a burden less way to train new employees as they come on board.
- **Turn Key Training Administrative Services** – we will also be happy to be your “virtual” training administrator. As you may know from personal experience, managing safety training can be a fulltime job. Let us work with you to develop a cost effective way to assume this role so you can concentrate on other safety responsibilities.

Success Stories:

-We assisted a major pharmaceutical company with content preparation, and the production and delivery of a successful online training program. Our services included turn-key online training administration (e.g., inviting employees to the online training, answering questions, sending reminder emails, etc). We also regularly reported useful metrics to our client.
